

US-1.5 — Show building information (pop-up details)

Personas: Emily Nguyen (new student), Liam Dubois (young staff), Sofia Lopez (graduate student), Alexia Martin (student with mobility disability), Jordan Lee (staff with colorblindness)

Given building polygons are visible, when the user taps a building polygon, then a pop-up (dialog/bottom sheet) appears showing building details.

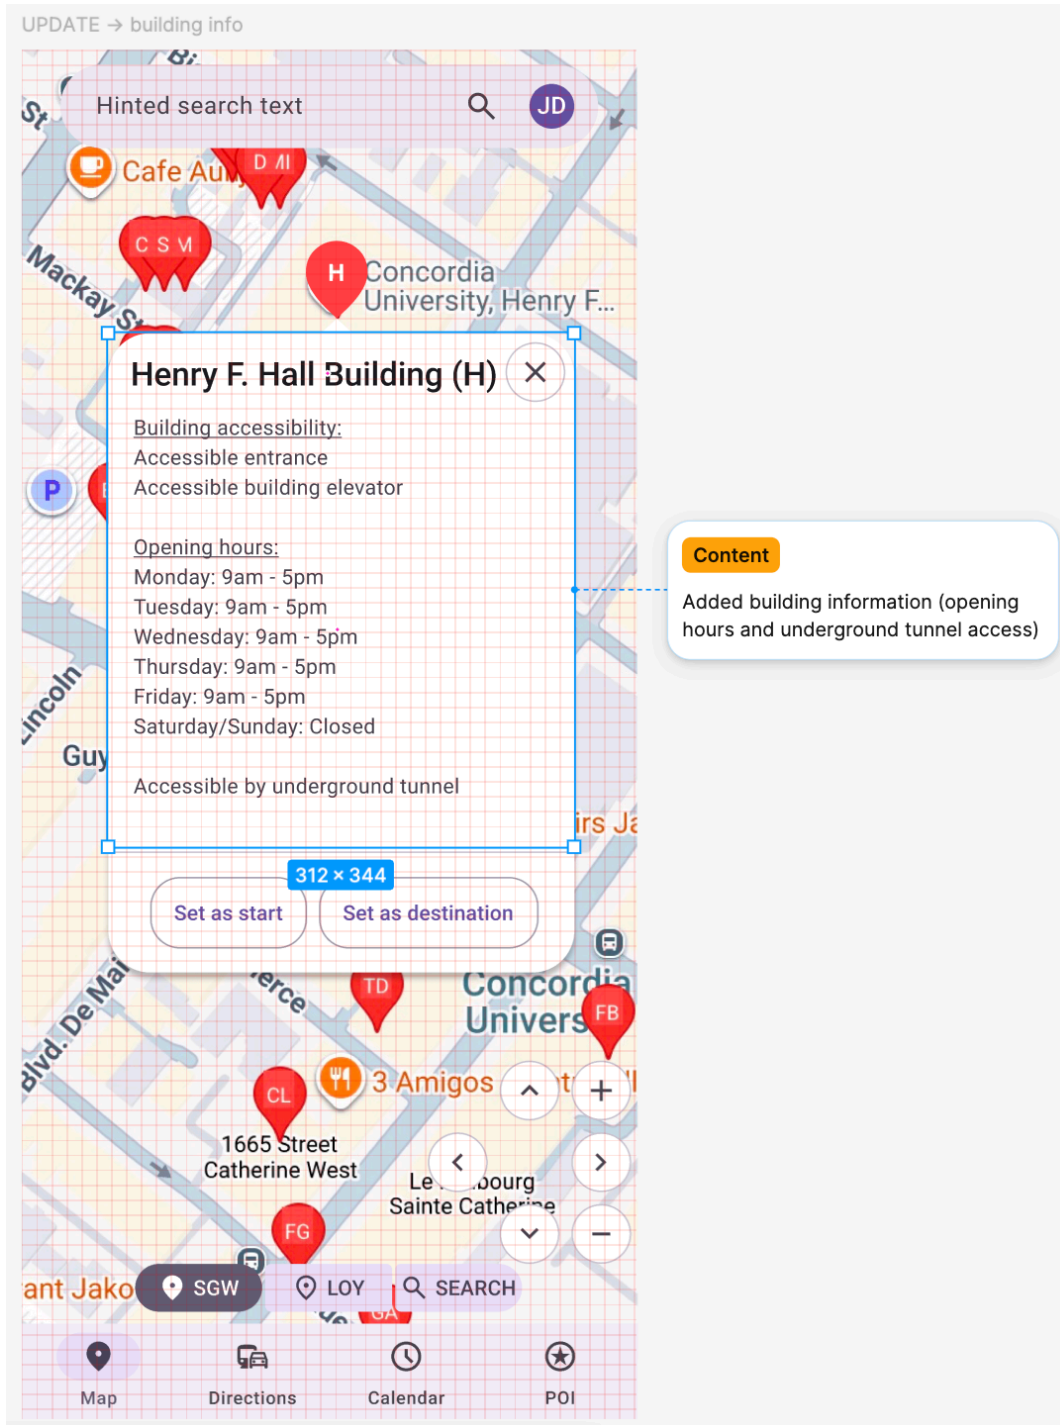

The building details include at minimum: building name and building code/identifier (as defined in the dataset).

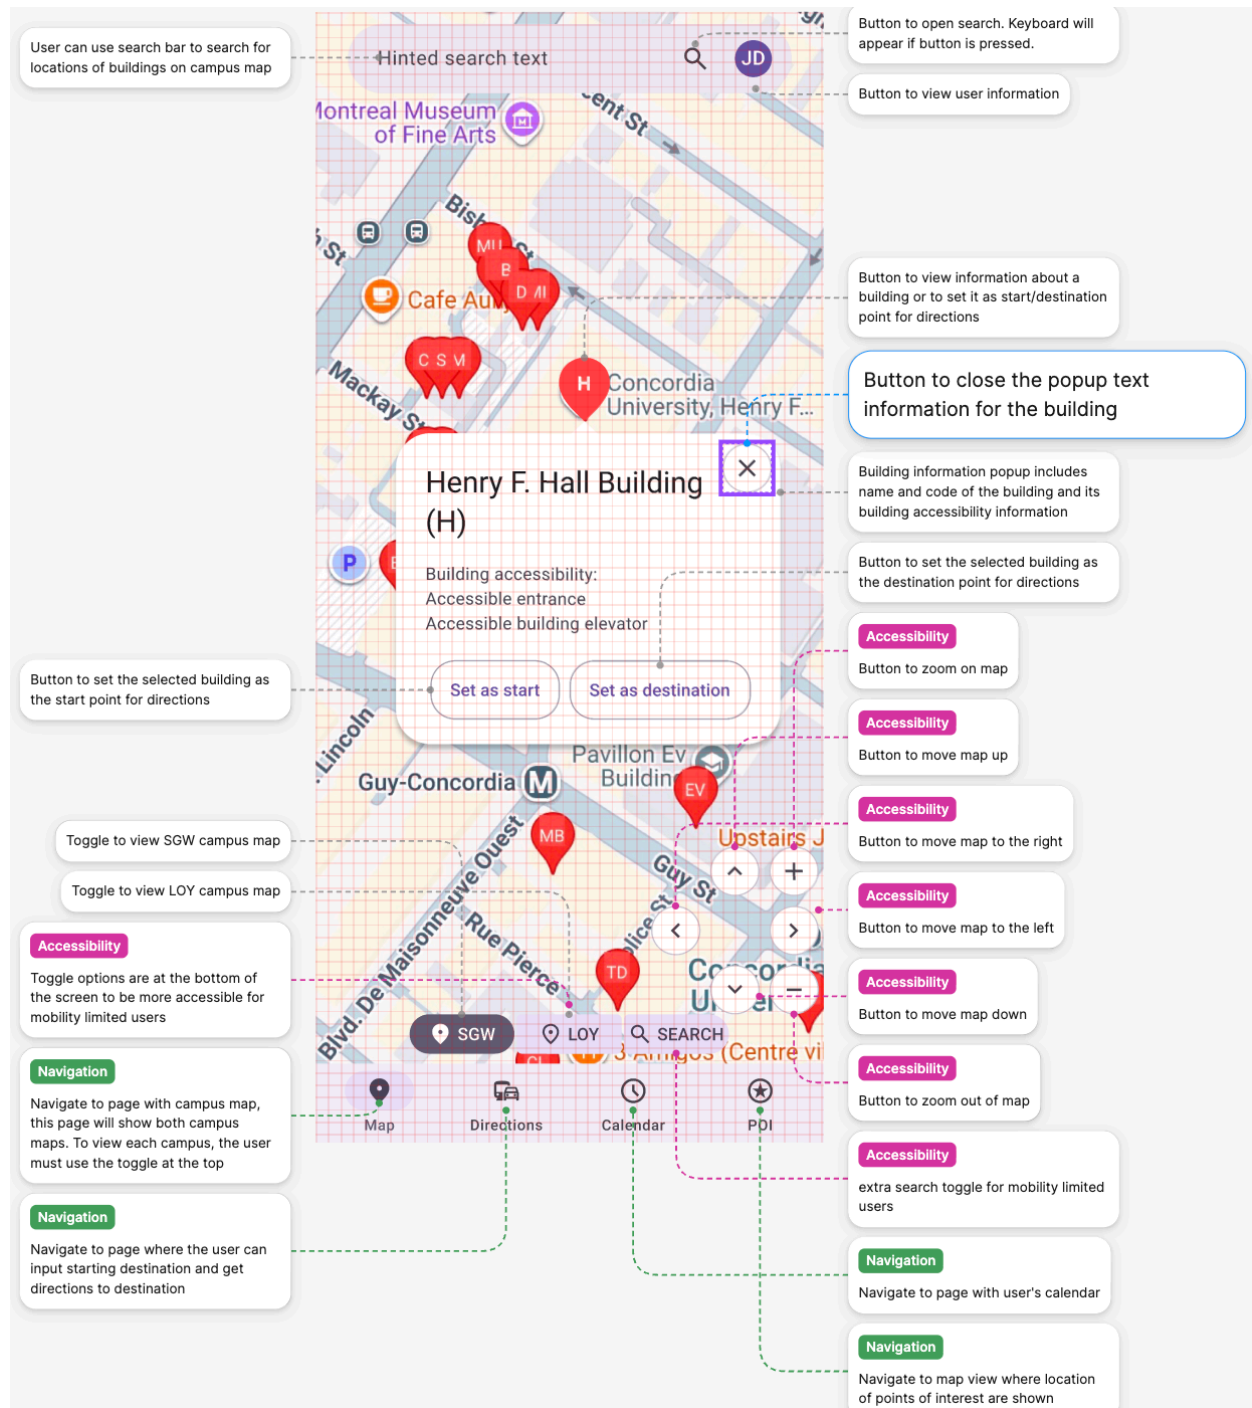

UPDATE after meeting with PO:

1. Need more information in building popup
 - a. Add opening hours
 - b. Add underground tunnel access information

The pop-up provides a clear way to close/dismiss it.

Users can press on another building identifier and open its corresponding popup
