

US-2.5 — Support SGW <-> Loyola routing

Personas: Emily Nguyen (new student), Liam Dubois (young staff), Sofia Lopez (graduate student), Alexia Martin (student with mobility disability), Jordan Lee (staff with colorblindness)

- Accessibility: cross-campus indication is conveyed via text (not only color).
- Given the start is on SGW and the destination is on Loyola (or vice versa), when the user requests directions, then the app returns a valid route (where supported by the selected transportation mode).
- The UI clearly indicates that the route is cross-campus.

view = cross campus walk

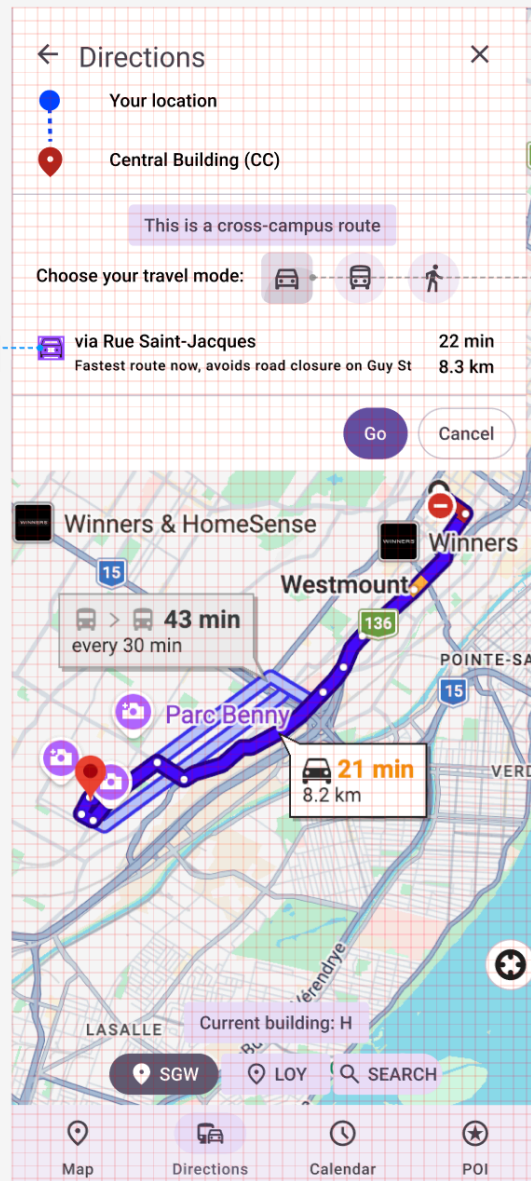

Added icon to show that walk mode is selected

Walk travel mode is selected

view = cross campus car

Added car icon to show that this travel mode is selected

Car travel mode is selected

If the selected mode cannot produce a route for cross-campus travel, the app shows a clear message and suggests selecting a different mode.
