

US-2.4 — Display route directions on the map using Google Directions API

Personas: Sarah Chen (regular student), Alex Thompson (new student/visitor), Jordan Martinez (student with disability), Yuki Tanaka (international student), Dr. Robert Kim (faculty/staff)

- Given both start and destination are set, when the user requests directions, then the app retrieves a route from Google Directions API and draws it on the map.

The app shows some route summary information (at minimum distance and estimated travel time).

- Accessibility: the route summary information is readable by screen reader.

The route remains visible while the user pans/zooms.
