US-1.2 — Render campus building shapes (polygons)

Personas: Sarah Chen (regular student), Alex Thompson (new student/visitor), Jordan Martinez (student with disability), Yuki Tanaka (international student), Dr. Robert Kim (faculty/staff)

- Given a campus is selected, when the map is displayed, then building polygons for that campus are rendered on top of the map.
- Accessibility: polygon colors/visual cues are not the only method of identification (e.g., buildings remain selectable/tappable, and building info can be accessed via interaction).

Building identifiers are written and point at their corresponding buildings (red location tag)
