- Remove all building pins from the map screen to avoid overcluttering. Building pin will appear if the user taps on a building overlay or searches for a building.
  - On tap of building overlay or building search, the according building information popup will appear
  - Closing the information popup will make the building pin retract and the map will be blank again

[UPDATE]view = update map view (no pins)

Update

Removed all the building pins as it made the screen very cluttered. The pin appears if user searches for a building or taps on a building to display building information

- On tap of a building overlay or a building search, the according building information popup will appear
- Closing the information popup will make the building pin retract and the map will be blank once again

Update

User searched for 'B Annex' so the pin on top of the building appears and the corresponding building information popup appears

Close button will close the popup information and the building pin will also disappear

B Annex
B
