

US-6.1 - View outdoor POIs on the map

- Given the campus map is displayed, when POIs are enabled, then outdoor POIs are shown as markers on the map.
- POI markers are visually distinct from buildings and shuttle stops.
- POIs shown are within a reasonable distance from the selected campus or user location.

If POI data cannot be loaded, the app shows a clear error message and does not crash.
Accessibility: POI markers have text labels or accessible descriptions readable by screen readers.
