Sprint 3 Retrospective

The Null Pointers

Shadi Marzouk	#27231466
Kevin Ung	#40259218
Samuel Vachon	#40281580
Oscar Mirontsuk	#40191431
Loucif Mohamed-Rabah-Ishaq	#40282580
Omar Chabti	#40262497
Anh Vi Mac	#40252504
Hossam Mostafa	#40245337
Hossam Khalifa	#40199572
Adam Oughourlian	#40246313
Abdeljalil Sennaoui	#40117162

Date: 21-02-2026

Meeting location: Zoom

Attendance: Everyone was present.

Summary:

Discussion around team's sprint progress, wiki documentation, and team conduct in GitHub PRs. There were many talking points and the team addressed their concerns regarding the current progress on the app.

Agenda:

- Pull Requests Management
- Wiki Documentation
- Issue Management
- Sprint Progress

Key Discussion Points:**1) Pull Requests Management:**

- Re-iterated the importance of pulling main before creating any PR to ensure no merge conflicts or errors
- Remind team members to check the merge conflicts after fulfilling the revisions requested on PRs.

2) Wiki Documentation:

- Team goal: automatically include code changes in the wiki
- Architecture page was updated
- Suggestion to remove diagram port as no databases will be used, only Concordia API
- Recommendation to write acceptance test issues immediately after completing user stories

3) Issue Management:

- Labels were added for bug types and severity to improve organization
- Burndown chart functionality needs verification

4) **Sprint Progress:**

- Team acknowledged this sprint was slower than expected due to other obligations (midterms quizzes other projects etc)
- Need to complete Epic 1
- User story 2.2 (routing and directions) is in progress Add bug labels/categories
- Commitment to increase work on the project for upcoming sprints.

Action Items

- Complete Epic 1
- Finish all acceptance tests and documentation
- Verify burndown chart functionality
- Increase pace for upcoming sprints, especially during reading week
- Avoid leaving work until the end of reading week (release scheduled for Monday after)

Next Meeting: Sunday at 12 PM with the Product Owner

Team Member Comments:

“We were all just swamped with other work from other courses that most of us didn’t perform as much as we wanted.”

“There wasn’t as much of an issue regarding the previous talking points in our retrospectives which is good ... We basically kept to the promise of maintain as little PRs simultaneously as possible and updated the wiki regularly which is good at least”
